

European Congress on Fertility Awareness Methods Irish College Leuven, Belgium, November 15th 2024

NFP-Vlaanderen vzw in collaboration with
the German 'Sektion Natürliche Fertilität'
of the 'Deutsche Gesellschaft
für Gynäkologische Endokrinologie
und Fortpflanzungsmedizin e.V.'

Call for Papers

Results and interim-results of scientific studies on fertility awareness-based methods (FAM), fertility and related themes can be sent to the congress secretariat.

Submission of abstracts for lectures and poster presentations

Deadline: **October 31, 2023**

Please send the completed form to info@nfp.be

Brief instructions on submitting an abstract

The abstract announcing a lecture/poster presentation to be held during the course of the FAM Conference serves a number of purposes:

- To help select the speakers for the conference
- To help devise the individual sections/lecture blocks during the conference
- For publication in a volume of abstracts for the purpose of informing conference participants and to help encourage them to develop their interest in the relevant topic after the conference.

This requires a precise and brief outline in a style suited to the audience in question, as conference participants need to be provided with an informative guide to help them make their choice of presentations to attend, given the broad range that will be on offer. We also need information that is as full and accurate as possible in order to be able to create a programme in which academic research in the empirical sciences is counterbalanced by accounts of its practical application.

The abstract should include the following items of information

- **Background/Objective:** Give a brief outline of the objectives behind your methodology, illustrative cases or studies, e.g. what are you trying to achieve with your method, what is it based on? What was the subject of your studies/work? What questions or hypotheses motivated you?

- **Method/Procedure:** Give a brief description of the material or procedure you used, the criteria for selecting human experimental subjects (in the case of research projects), how the procedure was implemented and the statistical basis (in the case of research projects) you applied.
- **Outcome:** Summarise briefly your (anticipated) main results.
- **Conclusion:** Describe briefly the conclusions you draw from your results and which aspects you intend to discuss further. Please pay particular attention here to the significance of your results for FAM. Outline consequences and/or questions that are pertinent to everyday practice involving FAM.

There is a character limit of 3,000 on the abstract (title, information on the author(s) and the relevant institution details are not included in the count). Tables, illustrations and diagrams are not permitted. We recommend that you first formulate the contents in e.g. a Word document and then copy them into the input screen form. Negotiations with a peer-reviewed international medical journal are currently underway.

Conditions

Submission of the conference contribution means that you accept the following conditions imposed by NFP-Vlaanderen

- All authors agree to their contributions being published.
- The authors assign all copyright in respect of the contribution in question to NFP-Vlaanderen.
- The authors agree to limit the contributions to the information contained in the abstract if the abstract is accepted for publication.
- A lecture should last not more than 8 minutes.
- NFP-Vlaanderen reserves the right to remove a presentation from the programme.
- Finally, the author vouches that at least one person will be present on the day to present the contribution. The authors will immediately inform NFP-Vlaanderen if they are not in a position to present their contribution or there is a change in authorship.

Preferred presentation form

- Lecture
- Poster presentation

Topic

- Effectiveness
- Infertility
- Pregnancy/Postpartum

- FAM at universities
- FAM and midwives or other health care professionals
- Cycle Apps and New Technologies
- Fertility Education for Youth
- Meeting Young Scientists
- Evidence Based Guidelines in FAM

Submission of abstracts

Title:

Lead author:

Second author:

Third author:

Description (max. of 3.000 characters)

- Background/Objective
- Method/Procedure
- Outcome
- Conclusion
